### **Notice of Construction**

#### **2025 Sanitary Sewer Lining**

Dear Resident,

As part of ongoing efforts to extend the life of our aging infrastructure, the Village has contracted with Copenhagen Construction Company and their subcontractor Visu Sewer to install cured-in-place pipe (CIPP) lining in large diameter sanitary sewers in your neighborhood. This process allows for the trenchless installation of a protective pipe liner with limited ground disturbance to the surrounding area. To learn more about the CIPP lining, please visit the Village's weblink provided below.

For this work, the contractor will be accessing the manholes located along streets and in the public utility easements in the area. These manholes will be accessed for cleaning prior to the lining, then once again for lining activities, and finally for inspection. You may notice temporary piping and cables laid between manholes during daytime construction operations or overnight between operations. If piping is laid across driveways or streets, Insituform will be providing access via temporary ramps for vehicles as needed or as otherwise directed.

Typically, each section of sewer to be lined will require up to twelve (12) hours to complete, generally between the hours of 7am & 7pm. **During portions of this time, the sewer connection to some homes will be sealed off. Homeowners will be asked to make limited use of toilet facilities and refrain from doing laundry** until the service connection can be reestablished. Additional precautions residents can take during the period of service interruption include keeping toilet lids down and pouring 1-2 cups of water into basement floor drains to keep any odors from entering the home (this recommendation can be done regularly).

Manhole access will be *intermittent* as construction activities progress. The subcontractor, Visu Sewer, and/or the Construction Manager will attempt to contact you in person prior to accessing the easements through backyards (if necessary). Before limited water usage period, affected homes will receive a white door hanger informing of the date and times of service interruption. (If work is canceled for that date a red door hanger will notify homeowners of the cancellation).

Thank you in advance for your understanding and patience during this project. The Village of Lake Zurich has set up a website for this project; please visit <https://LakeZurich.org/Construction> for additional information and project updates.

If you have any special needs or concerns, please contact Public Works Assistant Keli T. Amato 847.540.1755 [Keli.Amato@LakeZurich.org](mailto:Keli.Amato@LakeZurich.org)
